Hiring Manager
Signal 5 Pty Ltd
Melbourne, VIC

Dear Hiring Manager,

I am applying for the Graduate IT Support Engineer role at Signal 5. What attracted me immediately was the description of this role — someone early in their career who enjoys solving problems, helping customers, and working across infrastructure and cloud environments. That is exactly where I am and what I am looking for.

I bring two years of hands-on technical support experience from my role as a Technical Support Associate at Ozb Group (RMA), where I resolved customer issues by phone and in person, managed support cases from logging through to resolution, escalated complex incidents with clear documentation, and trained new staff on technical processes. Working methodically under pressure and communicating clearly with non-technical users are skills I use every day.

I am currently completing a Bachelor of Cybersecurity at Melbourne Institute of Technology, which has given me exposure to networking, Linux, cloud concepts, security fundamentals, and system administration. I have a genuine interest in AWS and cloud infrastructure, and I am actively building on this — Signal 5's environment of hosted infrastructure, monitoring, and incident response is exactly the hands-on experience I want to grow into.

I am a self-starter who takes ownership of tasks, learns quickly, and is comfortable working closely with founders and engineers in a small team. I would bring reliability, curiosity, and a practical approach to every problem I work on.

Thank you for considering my application. I would welcome the opportunity to contribute to Signal 5 and grow with the team.

Kind regards,

Pratik Dhami
