Hiring Team

Premier Retail Services Pty Ltd

Dear Hiring Team,

I am writing to apply for the Service Desk Specialist position at Premier Retail Services. The role stands out to me for a specific reason: it is explicitly designed for someone taking their first step into IT - and my background is a close match for the retail environment you support.

At Ozb Group (RMA) in Cheltenham, I spent nearly two years as a Technical Support Associate in a high-volume retail returns environment. The work was fast-paced and device-focused: diagnosing hardware faults, triaging technical issues for customers, recording each case accurately, and escalating anything beyond first-contact resolution with full context for the senior team. I also trained new team members on technical triage procedures and escalation standards - which maps directly to the JD's mention of "education of business users." The retail context at Premier Retail - scanners, POS systems, multi-store support - mirrors the kind of device-level, customer-facing technical work I did daily at Ozb Group.

I am currently completing a Bachelor of Cybersecurity at Melbourne Institute of Technology (expected July 2026), covering networking, operating systems, and security fundamentals. The degree adds technical grounding to the hands-on support experience I have already built. I am well-suited to a rotating roster and am comfortable with morning, afternoon, and evening shifts - I have been balancing study, part-time work, and a structured schedule for the past two years.

I would welcome the opportunity to discuss how my background fits the Service Desk Specialist role at Premier Retail. Thank you for your consideration.

Sincerely,

Pratik Dhami
