PROFESSIONAL SUMMARY

Technical support professional completing a Bachelor of Cybersecurity (Melbourne Institute of Technology, expected July 2026), with nearly two years of customer-facing IT support in a retail returns environment. Experienced in hardware fault resolution, accurate incident documentation, and training staff on technical workflows. Coursework covers Windows environments, networking, Active Directory concepts, and cybersecurity principles. Looking to transition into a structured service desk environment at MedHealth, where attention to detail, a patient communication style, and a commitment to continuous learning can contribute from day one.

CORE COMPETENCIES

Technical Troubleshooting

Hardware & Peripheral Support

Incident Documentation

Issue Escalation

User Support & Training

Windows Environments

Active Directory (studying)

Networking Fundamentals

ITIL Awareness

Customer Communication

WORK EXPERIENCE

Ozb Group (RMA) Jun 2023 - Apr 2025

Technical Support Associate

Cheltenham, Melbourne

- Resolved hardware faults and technical product queries for customers, applying systematic triage to distinguish user error from genuine device failure and escalating complex cases with full incident notes
- Maintained accurate records of every return and technical disposition, ensuring compliance with return policy documentation and producing a consistent audit trail
- Trained new employees on device triage procedures, escalation standards, and customer service workflows - bringing new hires to independent case-handling within the first week
- Managed high volumes of technical queries simultaneously, prioritising by urgency and following through to resolution or structured handoff

Carter Lovett Sep 2024 - Present

Kitchen Assistant

Elsternwick, Melbourne

- Maintained food safety compliance and team coordination under busy service conditions
- Demonstrated sustained attention to detail in a process-driven, high-stakes environment

TradeFlex Jul 2023 - Present

Office Cleaner

Melbourne

- Maintained workplace health and safety standards across commercial sites; managed supply restocking and compliance reporting

EDUCATION

Bachelor of Cybersecurity - Melbourne Institute of Technology Jun 2023 - Jul 2026 (expected)

Relevant coursework: networking fundamentals, Windows operating environments, Active Directory, cybersecurity principles, risk management, compliance frameworks. Plan to pursue ITIL Foundation certification within first 90 days of joining a service desk role.

TECHNICAL SKILLS

Support & Platforms: Hardware triage, first-level troubleshooting, device diagnostics, incident documentation, escalation handling

Technical Knowledge: Windows OS, networking basics, Active Directory (coursework), cybersecurity fundamentals, ITIL awareness (studying)

Soft Skills: Accurate record-keeping, customer communication, staff training, attention to detail, high-volume prioritisation
