Hiring Manager

Itro

Richmond, VIC

Dear Hiring Manager,

I am writing to apply for the Junior IT Service Desk Engineer role at Itro. The opportunity to join a Microsoft-focused MSP as a Level 1 engineer, with structured mentoring, funded Microsoft certifications, and a clear path to grow — is exactly the kind of role I have been working towards.

I bring two years of customer-facing technical support experience from my role as a Technical Support Associate at Ozb Group (RMA), where I provided Level 1 support by phone and in person, managed support cases from logging through to resolution, troubleshoot hardware and software issues across Windows-based environments, and trained new staff on technical processes. Customer service has always been at the core of how I work — I understand that people contacting a service desk need prompt, clear, and genuinely helpful support.

I am currently completing a Bachelor of Cybersecurity at Melbourne Institute of Technology, graduating July 2026. My studies have given me a solid grounding in Windows Server, Active Directory concepts, networking, Microsoft cloud environments, and security fundamentals. I am motivated to build on this with Microsoft certifications and hands-on MSP experience, and Itro's commitment to funded training and personalised development makes it an ideal environment to do that.

I am available to start immediately on a flexible basis, transitioning to full-time from July 2026 as I complete my final trimester. I am a proactive, reliable team member who takes ownership and is genuinely excited to grow within a Microsoft engineering environment.

Thank you for considering my application. I would love the opportunity to contribute to the Itro team.

Kind regards,

Pratik Dhami
