Hiring Manager

Tes Global

Melbourne, VIC

Dear Hiring Manager,

I am writing to apply for the Support Analyst role at Tes Global. The focus on customer outcomes, end-to-end case ownership, and continuous improvement across the SEQTA support function strongly aligns with how I approach support work — and I am genuinely motivated by the mission of making technology work better for schools and educators.

I bring two years of hands-on support experience from my role as a Technical Support Associate at Ozb Group (RMA), where I was the first point of contact for technical issues via phone and in person. I owned cases from first contact through troubleshooting, escalation, and confirmed resolution, maintaining detailed case notes throughout. I made sure customers were kept informed at every stage — not just resolved and closed. I also contributed to process improvements by identifying recurring issues, and trained new team members on support systems and standards.

I am comfortable working with customers who are not technical, explaining issues clearly and guiding them to solutions in a way that builds confidence rather than confusion. I understand that in a school environment, every unresolved issue affects teachers and students — that sense of urgency and responsibility is something I take seriously.

I am completing a Bachelor of Cybersecurity at Melbourne Institute of Technology and am committed to continuous learning. I am on a Partner Visa and hold full working rights in Australia — no employer sponsorship is required or requested. I am available to commence immediately.

I would welcome the opportunity to contribute to the Tes SEQTA Support team and to grow within a company that is genuinely making a difference in education.

Kind regards,

Pratik Dhami
