Hiring Manager

St Vincent's Health Australia

Melbourne, VIC

Dear Hiring Manager,

I am writing to apply for the Service Desk Analyst position at St Vincent's Health Australia. I am drawn to this role not only for the technical opportunity it presents, but because of St Vincent's commitment to compassionate, people-centred care — values that align closely with how I approach every interaction I have with people.

I bring two years of hands-on technical support experience from my role as a Technical Support Associate at Ozb Group (RMA), where I provided first-level phone and in-person support, logged and managed cases, trained new staff, and ensured compliance with service policies. Alongside this, I am currently completing a Bachelor of Cybersecurity at Melbourne Institute of Technology, which has strengthened my understanding of Windows environments, network fundamentals, and system security.

My background in customer-facing roles — including front of house and hospitality — has given me strong communication skills and the ability to remain composed, clear, and empathetic under pressure. I understand that the people contacting a service desk often feel frustrated or stuck, and I take pride in resolving issues efficiently while making users feel heard and supported.

I am a fast learner who is eager to grow within a large, complex organisation like St Vincent's, and I am committed to developing my skills in ITIL practices and enterprise IT tools. I would welcome the opportunity to contribute to your team and help deliver the high-quality support your staff and patients depend on.

Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to the St Vincent's team.

Kind regards,

Pratik Dhami
