Hiring Manager

KMTech

Melbourne, VIC

Dear Hiring Manager,

I am writing to apply for the Level 1 Service Desk Technician role at KMTech. The combination of a cyber-first culture, genuine investment in professional growth, and a people-first approach to technology makes KMTech exactly the kind of environment I am looking to launch my IT career in.

I bring two years of hands-on technical support experience from my role as a Technical Support Associate at Ozb Group (RMA), where I provided first-line phone and in-person support, managed support cases end-to-end, and trained new staff on technical systems and service processes. I consistently prioritised the client experience — not just resolving the technical issue, but ensuring every person I supported left the interaction feeling genuinely helped. I logged all cases accurately, adhered to service policies, and escalated promptly when needed with full documentation and context.

I am completing a Bachelor of Cybersecurity at Melbourne Institute of Technology, graduating in July 2026. This gives me a strong grounding in networking, Windows systems, security fundamentals, and incident response — directly relevant to the technical demands of a cyber-first MSP. I am committed to pursuing the MS-900 Microsoft Fundamentals certification as a first step, with CompTIA A+ to follow, and I am genuinely excited by the structured learning pathways KMTech offers.

I want to be transparent: I am currently completing my final university trimester, with classes on Tuesdays and Fridays until July 2026. I am fully committed to the full-time in-office requirement and happy to work around my university schedule for the next three months — after which I am available without restriction. I raise this upfront because I believe in being straightforward, which I understand is very much in line with KMTech's values.

I am curious, accountable, and genuinely motivated to grow in a team that challenges itself. I would welcome the opportunity to contribute to KMTech's mission of being the human face of tech.

Kind regards,

Pratik Dhami
