Hiring Manager
Virtual IT Group
Melbourne, VIC

Dear Hiring Manager,

I am writing to apply for the IT Support Technician role at Virtual IT Group. With two years of hands-on technical support experience and a Bachelor of Cybersecurity in progress at Melbourne Institute of Technology, I am well prepared to contribute to your team as a reliable, customer-focused first-line support technician.

In my role as a Technical Support Associate at Ozb Group (RMA), I provided first-line support via phone and in person, diagnosing and resolving hardware and software issues for a diverse customer base. I logged all support requests with accurate records, collaborated with the team to improve processes, and trained new staff on technical systems and best practices. Ensuring users felt genuinely supported — not just technically resolved — was always a priority for me.

My cybersecurity studies have strengthened my understanding of computer systems, networking fundamentals, IT security best practices, and Windows environments. I take a methodical approach to troubleshooting and enjoy educating users on how to get the most out of their technology safely and effectively.

I am available to commence from July 2026 upon completing my final trimester, and am happy to discuss flexible arrangements in the interim. I am a fast learner who adapts quickly to new technologies and thrives in collaborative team environments.

Thank you for considering my application. I would welcome the opportunity to contribute to Virtual IT Group.

Kind regards,

Pratik Dhami
